

# ANATOMIC PATHOLOGY Veterinary Pathology Labs

Gain productivity and insight into your veterinary anatomic pathology lab. LABdivus® software platform for the veterinary pathology labs is designed to help your lab gain 4X efficiency for your lab techs and pathologists while providing complete specimen management. Manage and grow your lab business with software designed for your veterinary requirements.

**PERFECT THE WORKFLOW. PERFECT THE BUSINESS.**

## CORE APPLICATION FEATURES

LABdivus® Veterinary Anatomic Pathology workflow software is designed, developed, tested and curated by top industry professionals in the veterinary and anatomic pathology labs fields.

### SPECIMEN TRACKING

We know specimen tracking is of utmost importance in a highly regulated environment. To know what specimens are in the work queue, where they are and who handled them provides valuable real-time information as well as an imperative historical perspective.

### LAB PROCESS INTEGRATION

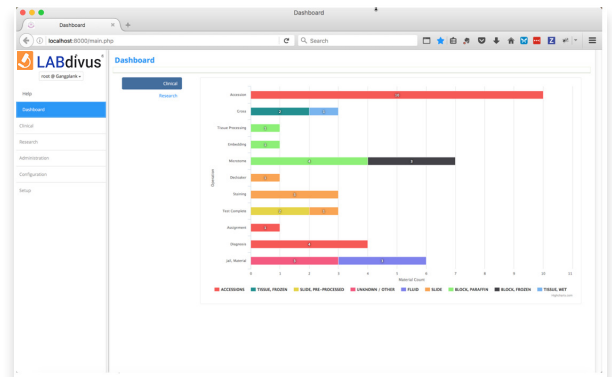

With LABdivus®, manage and track your lab samples from accession to completion. Barcoding printing specimen blocks and slides ensures patient/specimen integrity. Manage the Work-In-Progress of your lab to ensure cases are processed by your techs. Attach pictures and documents to your accession for complete documentation.

### PATHOLOGIST DIAGNOSIS REPORTING

Pathologists have complete control over diagnosis and billing codes, microscopic descriptions and additional commentary needed for the technical components. LABdivus® offers whole-body autopsy reporting and rich text editing for your diagnoses. Integrated billing options for diagnosis and tests applied to the case manage your financial work. Achieve 4X efficiency over traditional diagnosing and report sign out - get more done in less time!

### LAB INSIGHTS, METRICS AND REPORTING

See your lab operations work volume at every workflow step. Report on lab tech throughput, turn-around-time, completed diagnosis reports and specialized reports such as cancer reports and high profile diagnosis reports. Get control of your lab operations. Eliminate bottlenecks, track employee quality of work and output, plan for lab consumable purchases and more. Optional billing generation for case tests and diagnosis work ensures your financial success.

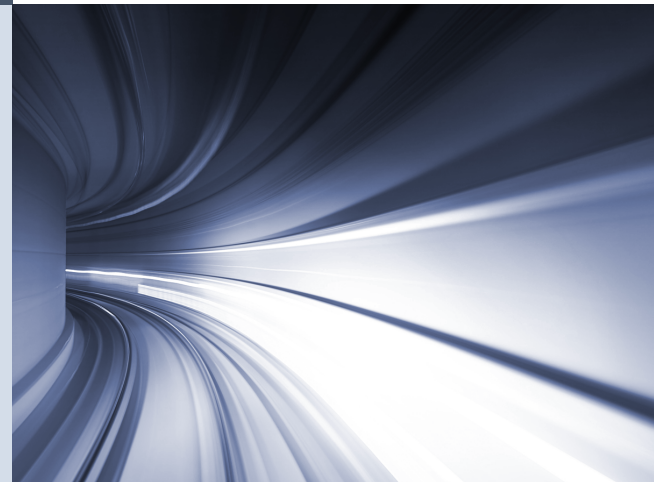

Accession: A16-00003-A  
Specimen: A16-00003-A  
Test Results: [Table with columns for Test Name, Result, and Status]

Pathologist: A16-00009  
Specimen ID: A16-00009  
Diagnosis: [Text field]  
Comments: [Text area]

# COMPANY INFO

We are a team of laboratory and engineering professionals who provide great software for your laboratory. Our laboratory team members are the leaders in the clinical anatomic pathology laboratory and research laboratory fields with decades of pathology laboratory management experience. Our application development team includes professionals with over 30 years of experience creating large system database, web application, security architecture, and systems programming.

**PERFECT THE WORKFLOW. PERFECT THE BUSINESS.**

## ACCESSIONING AND GROSS

Accession your prostate cases, select from pre-defined 6/12/14/18 and custom prostate biopsy count. LABdivus<sup>®</sup> automatically matches the prostate specimen biopsy locations to the specimen letter sequences. LABdivus<sup>®</sup> incorporates automatic cassette printing on-demand at Gross. Grossing macros enables techs to quickly enter key information.

## MICROTOMY EFFICIENCY

LABdivus<sup>®</sup> User Interface and microtomy automation features increase your specimen throughput. Barcoded cassette scanning automatically create slides/slide labels for your specimens. Ensure patient-specimen integrity by only printing on demand slides/slide labels for the specimen cassette being cut. Add tests or control slides as needed with quick input. LABdivus<sup>®</sup> highlights microtomy workstation stat cases, recuts and new test adds by pathologists to aid in histotech efficiency, enabling the histotech to spend more time cutting and less time on the keyboard.

## CUSTOMIZABLE WORKFLOWS

LABdivus<sup>®</sup> adapts to your lab workflow. Each workflow step can be optionally used or removed depending upon your lab requirements. Track embedding if you have a large lab with multiple techs or remove embedding from the workflow. Track specific stainer operations. LABdivus<sup>®</sup> supports special IHC-specific workflows like pre-bake and retrieval prior to IHC staining based on tests applied to the slide.

## REGULATORY COMPLIANCE AND SECURITY

LABdivus<sup>®</sup> maintains your CAP/CLIA/FDA compliancy with workflow tracking and compliancy reporting of lab operations. Password protection, two-factor authentication and administrative-designated restrictions for users at all lab workflow operations provides a secure operation that is fully HIPAA compliant.

## EQUIPMENT INTEGRATION

Optional LABdivus<sup>®</sup> workflow connections to lab equipment and special processing machines optimize your laboratory workflow and reporting requirements.

## PRINT & SCAN

LABdivus<sup>®</sup> supports a variety of label, slide and cassette printers with the capability to print 2D barcodes on accession labels, blocks and slides or slide labels. Scan requisitions or reports directly into LABdivus<sup>®</sup> and eliminate paper travelers throughout the lab. LABdivus<sup>®</sup> provides digital document viewing at various workflow steps for better decisions. Integrated image capturing via cameras or slide scanners enables picture data for grossing, case incidents or diagnosis reporting.

## WEB APPLICATION, CLOUD ENABLED

LABdivus<sup>®</sup> runs on our cloud server as a web application in your lab. Eliminates need for on-premise server and maintenance IT services. The user friendly interface is designed for pathology labs with security in mind.

## CEREBRUM BENEFITS

- Technical support
- Free cloud installation
- Free software updates
- Compliancy guarantee
- 30 day guarantee
- Monthly rate packages
- Paid in full discounts
